

PC Coaching Trainer Services For NPfIT

Trainer Services

Introduction

PC Coaching have access to a national team of NHS training professionals who have wide-ranging experience and understanding in working within the NHS.

Our trainers have recognised training qualifications, are highly experienced and are approved to deliver training to clinical and clerical staff on both standard and bespoke healthcare systems.

We can provide a wide range of trainers including:

- Care Records Trainers
- PACS Radiographer Trainers
- PACS non Radiographer Trainers
- Essential PC skills and ECDL trainers

Special Daily Rates

There are special daily rates for trainers when booked with a mobile training unit (MTU). They provide exceptional value, and as part of the agreement with NHS CFH start at just £245 a day.

This means that a mobile training unit and trainer can be booked for as little as £49 per delegate including all PC's, training equipment and onboard configuration.

All our trainers are fully trained in the operation of our MTUs.

Supplementary Trainers

We can also provide our trainers, without a mobile training unit, at highly cost effective rates.

They can be booked on either a daily basis or for longer-term requirements, be used as the backbone of your training deployment, or to supplement in-house training teams.

Quality Trainers

All of our trainers have been carefully selected and 'Institute of IT Training' TAP approved or have equivalent training qualifications ensuring delivery skills at the highest possible level.

Training Courses

Our training courses are interactive, emphasising the importance of hands-on practice so that delegates fully understand the functions of their systems and can use them more effectively in their workplace.

For all trainer daily rates and course outlines or to discuss any element of our training services please contact one of our NHS account managers.
