PC Cabin

Key Features

- The PC Cabin has been designed as a flexible mobile IT training unit intended for stays of 12 weeks or longer on site.
- It is 12m long by 3m wide by 3m high and is deployed on site on the back of an HGV and lowered into place by an onboard crane.
- The interior is equipped with 12 special designed delegate workstations each with high specification PC, 17" LCD monitor and adjustable keyboard and mouse. Optionally card readers can be provided.
- There are two optional configurations as either a 12 delegate classroom or two smaller 6 delegate classrooms.
- The PC Cabin can be quickly connected to the N3 spine either by cable or wirelessly.
- There is a dedicated trainers workstation equipped with a projector and whiteboard.
- Toilet facilities available that are accessed from an external door on the unit. The unit is self-contained and does not require plumbing.
- The PC Cabin is equipped with two reverse cycle air-conditioning units for complete climate control.
- A 32 amp single phase supply is required to power the unit. Optionally a generator can be provided.
- All IT equipment is protected by a UPS.
- There is space to install an additional server(s) if required.
- The unit is highly secure with steel shutters and reinforced doors and locks. It is also fully alarmed.
- The PC Cabin meet all Health and Safety requirements including lighting, workstations and fire regulations.
