

PC Pod

Key Features

- The PC Pod has been ergonomically designed to seat 10 delegates and one trainer in complete comfort at purpose built, fully adjustable workstations.
- Delegate workstations have been designed to maximise legroom, space and comfort.
- The keyboard, monitor and seating position are fully adjustable for maximum comfort.
- The trainer's area benefits from a specially designed workstation area with additional space for notes and handouts.
- The trainer has the ability to show their screen on every delegate monitor and additionally they can remotely observe each delegates progress. The raised trainer's workstation allows eye contact with every delegate and the interior of the Pod has been acoustically engineered to ensure that instructions can be easily heard without the need for a microphone.
- Each Pod comes with a 50" Plasma screen for presentation, a white board, flip chart and printer.
- Networking is easily achieved. The Pod can be connected to a company's network by either using a cable to the on-board switch or a wireless connection.
- Climate controlled environment with variable temperature control ensures delegate comfort all year round.
- Power requirement is one 32-amp single-phase connection. 15m of heavy duty weather proof power cable is available.
- Security. Each Pod is alarmed and fitted with a variety of security devices.
- Health and Safety: each Pod contains secondary lighting in case of a power loss plus an illuminated 'Fire Exit' sign.
- Disabled Access is achieved via an inbuilt ramp system that is easily deployed and kept in place if needed to provide assisted wheelchair.
- Compliance Built: Full Health and Safety and Electrical compliance certified. Copies of Electrical Installation Certificates will be provided upon delivery.
